DETAILED ACTION

Claims 97, 98, 103 and 104 are pending from the amendment filed 03/07/06.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 97, 98, 103 and 104 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is new matter rejection.

The specification as originally filed does not support the scope of the presently claimed composition of claim 104. While the specification at paragraphs [0009], [0011], [0024], [0046], [0048], [0051], [0060] and [0061] supports the general composition of claim 104, the specific composition limited by the consisting essentially of now recited in claim 104 is not envisioned. The specific composition having the specific ranges as stated in the claims additionally with the consisting essentially of was not envisioned at filing. There is nothing in the specification pointing to this specific combination of components and amounts. Most of the disclosure includes growth factors. And when not present, only a few specific formulations are described but not as claimed in claim 104. See for example paragraphs [0002], [0003] and [0009].

Art Unit: 1618

Applicant may overcome this rejection by amending the claims to be commensurate with the composition disclosed in the specification.

Response to Amendment

The preliminary amendment filed 2/1/05 presents amendment for the second paragraph on page 14 of the original specification. However, the text amended appears on page 16 of the specification and not page 14.
